

WPA2/AES Wireless Setup

Mac OSX 10.4.11

To set up a wireless connection on your MAC OSX laptop, please do the following:

Click on the *Airport icon* and select "Other..."

From the Network Name dropdown box, select AlgSecureWLAN (or type it manually if it does not appear).

Select WPA2 Enterprise as the Wireless Security type.

Enter your username and password you would normally use for Blackboard, Email, etc.

Ensure 802.1X Configuration is set to Automatic and press OK.

Configuration is complete.
