

Michel de Jocas

BScUrb, MES

Principal, Educational Consulting Services (ECS)

Michel brings a strong analytic focus to each project. He is able to reduce complex planning scenarios into manageable elements, and translate client's objectives and vision into effective recommendations and implementation plans. He understands the specific, local challenges that different institutions face and has worked extensively in North America and the Middle East.

Michel works equally well in English and French.

In over 30 years at ECS, Michel has led a wide array of facility, educational and management planning assignments. Experience has given him insight into the day-to-day operations and strategic challenges related to the effective delivery of quality learning in optimal environments.

Michel has directed system-wide facilities benchmarking studies including assessing physical capacity, utilization and space requirements of 19 post-secondary institutions for Alberta Advanced Education and Technology, and developing the Colleges Ontario Facilities Standards & Inventory (COFSI) framework for all 24 colleges in the province. Recent clients include Brock University, Canadore College, Fleming College, Langara College, NAIT, Nova Scotia Community College, Red River College, SaskPolytechnic, Sheridan College, Simon Fraser University, University of Maryland Baltimore County, University of Northern British Columbia.
